

Tru-Stain

Tru-Stain are special reactive concrete stains that produce a range of vibrant and dramatic colors that are UV stable when sealed for use in interior and exterior decoration of concrete.

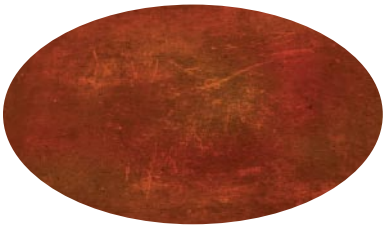

Tru Aqua

Tru Authentic Tan

Tru-Stain concrete stains come in a variety of organic colors. The final brilliant results are unmatched by any other process and leave an antique patina type finish. They react chemically with the mineral content of the concrete surface for a deep penetrating and permanent staining. All of these stains are UV stable when sealed. They will not fade in direct sunlight, making them ideal for interior or exterior use.

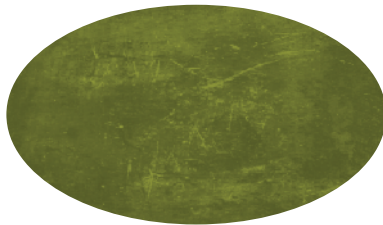

Due to variations in concrete composition, age, surface conditions, surface preparation, and application techniques exact color will vary from project to project.

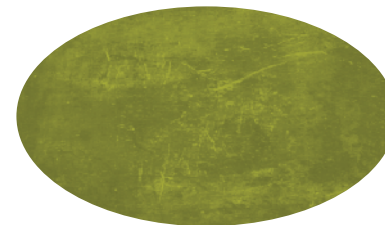

Tru Brown

Tru Cola

Tru Copper Green

Tru Green
